

PROTECTION SERVICE FOR BUSINESS

Protection Service for Business is the best, most comprehensive endpoint protection package on the market, designed from the ground up to solve your challenging business security needs.

It protects all your endpoints, from Windows and Mac to mobile devices, against threats like ransomware, data breaches and 0-day attacks, without requiring significant maintenance or management overhead.

Protection Service for Business is the only unified multi-endpoint security solution that comes with integrated Patch Management, Mobile Device Management, and a Password Manager.

We are proven to provide superior and more consistent protection than our competitors, as verified by independent security experts. Thanks to our pioneering security technologies, such as real-time threat intelligence and advanced machine learning algorithms, we are always one step ahead of the attackers.

COMPUTERS

Protection Service for Business provides powerful and modern security for your Mac* and Windows endpoints. With tools like Patch Management and real-time threat intelligence provided through the F-Secure Security Cloud, your security rises to a whole new level.

Supported OS:

Windows 7, 8, 8.1, 10
OSX 10.10, 10.11, 10.12.1

Advanced Anti-malware

Advanced anti-malware platform that uses multi-engine detection capabilities, offering vastly better security without being reliant on a single technology.

DeepGuard

Offers proactive protection against 0-day malware and exploits through the use of heuristic and behavioral analysis.

Lightweight

Minimal performance impact; can be used with both new and old hardware.

Firewall

F-Secure Firewall uses default Windows engine to execute firewall rules, based on extensive list of advanced rules created by our penetration testers.

Security Cloud

Our threat analysis and response systems provide our clients with real-time threat intelligence, allowing them to identify and respond to new threats as they emerge.

Device Control

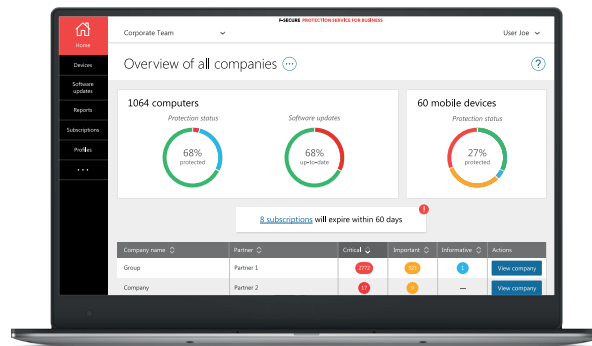

Enables control over USB-based devices, preventing data loss and malware infections via them.

Patch Management

Automatic patching of 2500+ Windows and 3rd party software, with options for exclusions and manual updates. Blocks up to 80% of malware by preventing them from exploiting existing vulnerabilities.

Web Protection

Provides extensive and proactive web protection; it blocks malicious content, and scripts, giving added protection for business critical web activity and preventing end-users from accessing malicious or phishing sites.
