

## PROTECTION SERVICE FOR BUSINESS

**Protection Service for Business is the best, most comprehensive endpoint protection package on the market, designed from the ground up to solve your challenging business security needs.**

It protects all your endpoints, from Windows and Mac to mobile devices, against threats like ransomware, data breaches and 0-day attacks, without requiring significant maintenance or management overhead.

Protection Service for Business is the only unified multi-endpoint security solution that comes with integrated Patch Management, Mobile Device Management, and a Password Manager.

We are proven to provide superior and more consistent protection than our competitors, as verified by independent security experts. Thanks to our pioneering security technologies, such as real-time threat intelligence and advanced machine learning algorithms, we are always one step ahead of the attackers.

## MOBILES

**Protection Service for Business** gives you an easy way to secure and control your mobile devices, both iOS and Android, wherever they are. You get everything you need in one package: mobile device management, anti-malware, and VPN.

### Supported OS:

iOS 9.x and later

Android 4.0.3 and later

### Mobile Device Management

Allows you to configure and enforce passcode policies, and remotely lock or wipe lost or stolen devices.

### Mobile VPN

Automatically encrypts (VPN) all traffic between mobile devices and a selected F-Secure service node, allowing safe use of public Wi-Fi and mobile networks.

### Lightweight Client

Heavy security functions are in the cloud, ensuring minimal impact on mobile performance and battery life.

### Ultralight Anti-malware

When the VPN is active, our service node protects the phones against malware and malicious content. Android APK packages are also scanned locally.

### Security Cloud

Our threat analysis and response systems provide our clients with real-time threat intelligence, allowing them to identify and respond to new threats as they emerge.

### Web Protection

Prevents users from accessing malicious and phishing websites, even before they are accessed.

### Faster Browsing

Increases browsing speed by up to 30% by using traffic compression and blocking resource-intensive online tracking and advertising.

### Device Status

Provides detailed information about the devices, such as vulnerable OS versions and whether they are rooted or not.

### External MDM

Supports deployment via third party MDM solutions, such as AirWatch, MobileIron, Intune and MaaS360.
