

PROTECTION SERVICE FOR BUSINESS

Protection Service for Business is the best, most comprehensive endpoint protection package on the market, designed from the ground up to solve your challenging business security needs.

It protects all your endpoints, from Windows and Mac to mobile devices, against threats like ransomware, data breaches and 0-day attacks, without requiring significant maintenance or management overhead.

Protection Service for Business is the only unified multi-endpoint security solution that comes with integrated Patch Management, Mobile Device Management, and a Password Manager.

We are proven to provide superior and more consistent protection than our competitors, as verified by independent security experts. Thanks to our pioneering security technologies, such as real-time threat intelligence and advanced machine learning algorithms, we are always one step ahead of the attackers.

SERVERS

Protection Service for Business offers you the utmost security for your servers, while keeping them running at peak performance. Dedicated security components are available for Exchange, SharePoint, and Citrix servers.

Supported Platforms*:

Microsoft Windows Server operating systems, Microsoft Windows Terminal Server, Microsoft Exchange Server, Microsoft SharePoint Server, Citrix Server, Linux Server

Advanced Anti-malware

Advanced anti-malware platform that uses multi-engine detection capabilities, offering vastly better security without being reliant on a single technology.

DeepGuard

Offers proactive protection against 0-day malware and exploits through the use of heuristic and behavioral analysis.

Patch Management

Covers 2500+ server and 3rd party software, such as Apache, BizTalk, Microsoft SQL, Flash, Java, and many others.

Security Cloud

Our threat analysis and response systems provide our clients with real-time threat intelligence, allowing them to identify and respond to new threats as they emerge.

Web Protection

Provides proactive web protection for terminal users by blocking malicious content in web traffic and by preventing access to malicious and phishing sites.

Exchange

Adds support for scanning message bodies and attachments for malicious content for inbound, outbound, and internal mail. Includes high-accuracy spam filtering.

SharePoint

Multi-engine malware detection support for uploads and downloads.

Citrix

Adds full security stack support for Citrix. Citrix Ready certified. Adds patch management support for published applications.
